

SALWAN PUBLIC SCHOOL, MAYUR VIHAR

Academic Session: 2024-2025

Report on CBSE Interaction Programme NCF

Day & Date: Tuesday, 25 June 2024

Topic-CBSE Interaction Programme NCF

Number of the resource person: CBSE stakeholders

Attendees: All Staff Members

Name of the organiser: CBSE

An online CBSE interaction workshop was held on Tuesday, 25 June 2024 focused on the National Curriculum Framework for School Education (NCF-SE), outlining key principles and guidelines for educators and curriculum developers. The NCF-SE aims to serve as a comprehensive guide for practitioners in education, ensuring clarity and applicability across diverse educational contexts. The framework emphasises specificity without imposing rigidity, providing nonbinding suggestions and practical examples to aid understanding and implementation. It encourages innovation while offering a foundational starting point for educators.

Addressing concerns about prescription versus autonomy, the NCF-SE balances specificity with flexibility, acknowledging the importance of context-specific adaptations and modifications by practitioners. Grounded in real-world constraints like time, resources, and teacher preparation, the framework advocates a balance between idealism and pragmatism. It offers both short-term solutions and long-term goals to address educational challenges effectively. By setting clear and specific learning standards, the NCF-SE aims to enhance clarity for all stakeholders, including policymakers, administrators, teachers, parents, and students. This clarity ensures alignment with educational outcomes while promoting consistency and quality in curriculum development and delivery.

The NCF-SE represents a significant step towards improving educational standards by providing a structured yet adaptable framework that fosters innovation and meets the needs of diverse educational settings in India. It serves as a guidepost for educators to navigate curriculum development effectively, ensuring holistic development and optimal learning outcomes for students. Overall, the workshop highlighted the importance of understanding and effectively implementing the NCF-SE to enhance educational practices across the country.
